

VIKING THERAPEUTICS, INC. (VKTX)

Equity Research Report | As of: August 23, 2026

RISK PROFILE
Neutral

RECOMMENDATION
Neutral

SEC QTR FILING
07/29/26

PRICE
\$33.89

DIVIDEND YIELD
N/A

P/E RATIO
-7.26

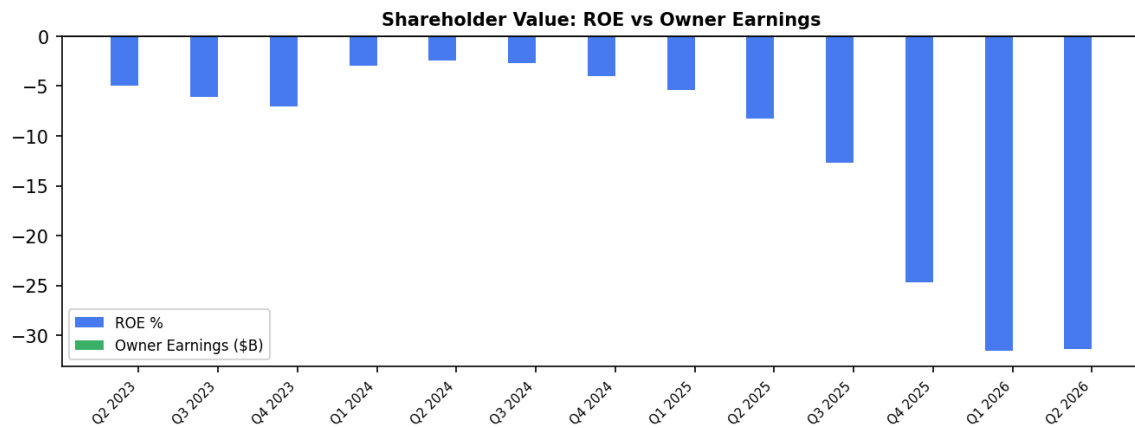

FC YIELD
-10.62%

ALTMAN Z-SCORE
18.40

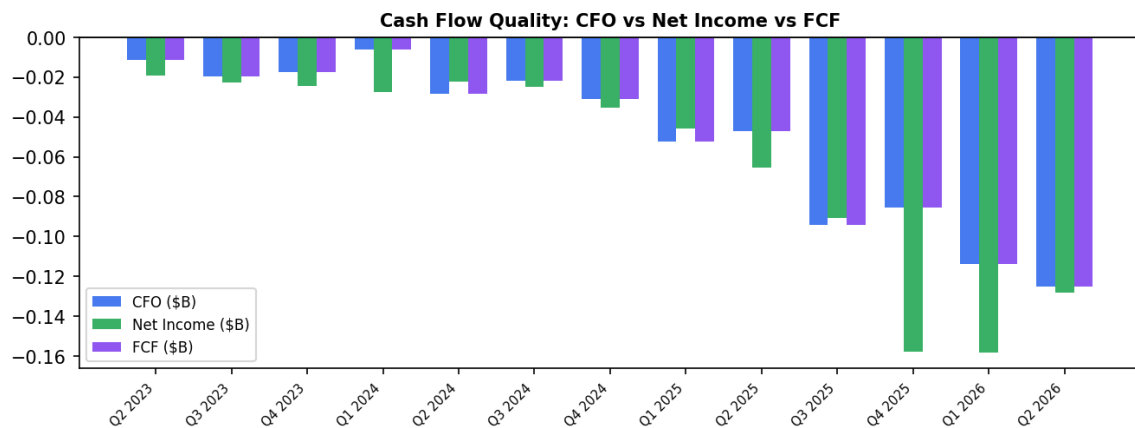

EV/FC RATIO
N/A

SECTOR
Healthcare

INDUSTRY
Biotechnology

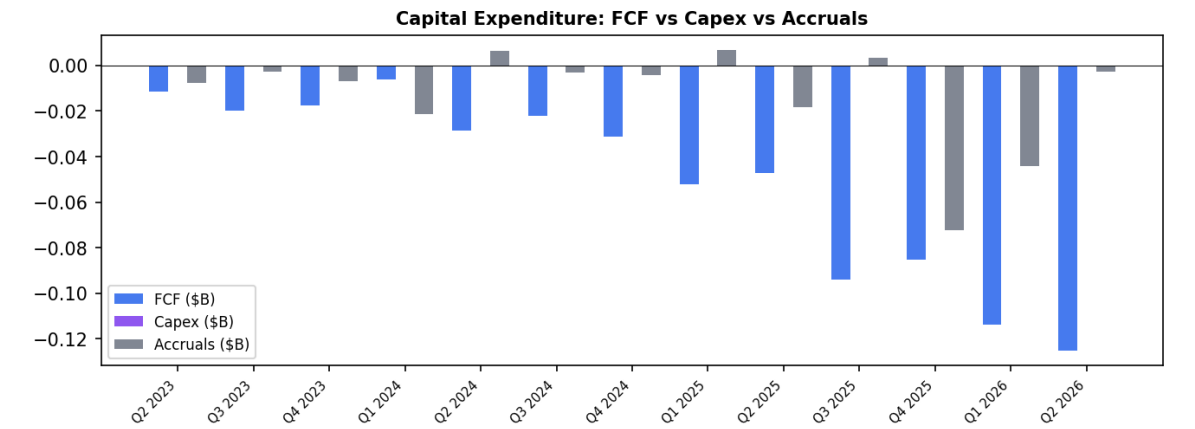

This chart shows if a company is earning both an accounting profit (ROE) and an economic profit (Owner Earnings). Owner Earnings = Cash Flow from Operations + Capital Expenditures. A positive trend in both metrics indicates the company is creating shareholder value.

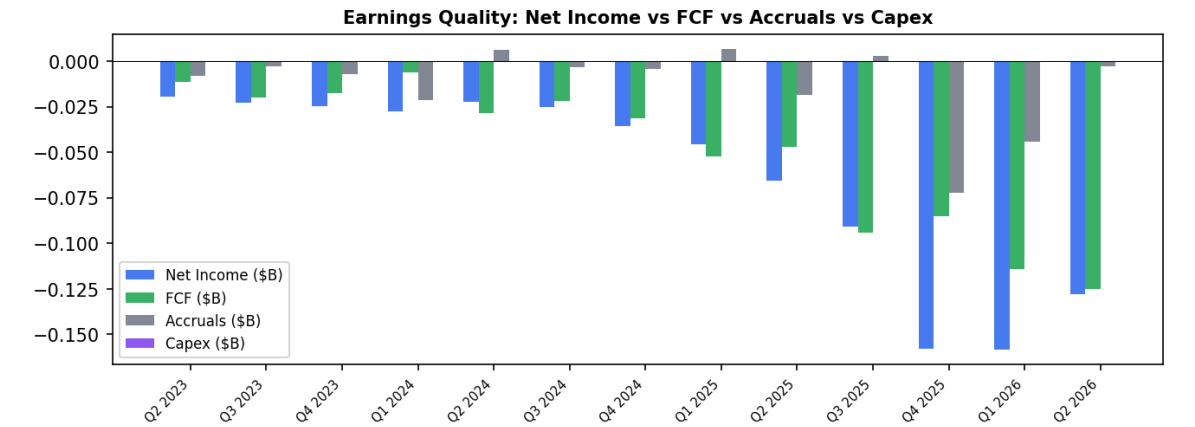

Cash Flow From Operations of \$-0.1B exceeds net income of \$-0.1B. CFO is 1.0x that of net income. CFO decreased 166.0% year over year to \$-0.1B in Q2 2026.

VIKING THERAPEUTICS, INC. (VKTX) — Capital & Earnings Quality

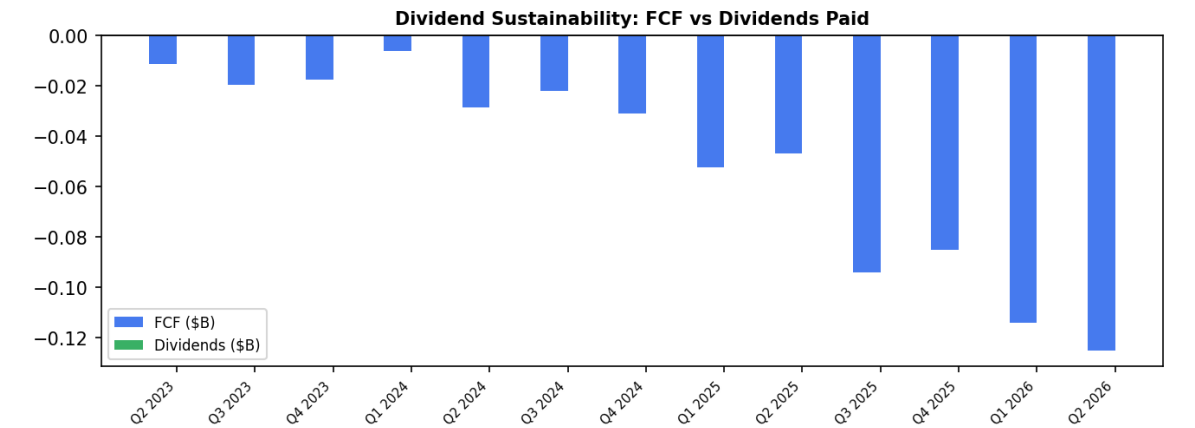

August 23, 2026

Accruals increased 84.6% year over year to \$-0.0B in Q2 2026. Capital expenditures have increased by nan% over the last year while free cash flow has decreased by 166.0%. Free cash decreased 166.0% year over year to \$-0.1B in Q2 2026.

This chart measures the relationship between net earnings and accruals. Also, it measures free cash and capital expenditures. Knowing how accruals affect net earnings is key to understanding the difference between GAAP earnings and cash based earnings.
(FC) Free Cash / (ER) Net Income: 0.98X

Current Dividend Yield is None%. FC Payout Ratio: N/A. FC Yield: -10.62%.

SL=Sales, TC=Total Capital, TL=Total Liabilities, TA=Total Assets, OC=Operating Cash Flow, EP=Economic Profit (Owner Earnings/EV), CROIC=Cash Return on Invested Capital.

Glossary of Terms

McLean Capital Research | August 23, 2026

Chart Metrics

Term	Definition
ROE	Return on Equity. $\text{Net Income} \div \text{Total Stockholders' Equity}$. Measures how efficiently a company uses shareholder capital to generate profit.
EP (Owner Earnings)	Economic Profit / Owner Earnings = $\text{Cash Flow from Operations} + \text{Capital Expenditures}$. Buffett's measure of true economic earnings — cash a business can distribute without impairing its competitive position.
CFO	Cash Flow from Operations. Cash generated by the company's core business activities. A key indicator of earnings quality.
NI	Net Income. GAAP bottom-line profit after all expenses and taxes. Contains non-cash items (accruals).
FCF	Free Cash Flow = $\text{CFO} - \text{Capital Expenditures} - \text{Dividends}$. Cash available after maintaining/expanding the asset base and paying dividends. Note: this definition includes dividends in the deduction.
Capex	Capital Expenditures. Cash spent on property, plant, and equipment. Shown as absolute value (positive) in charts.
Accruals	$\text{Accruals} = \text{Net Income} - \text{CFO}$. Measures the non-cash component of earnings. High accruals relative to income may indicate lower earnings quality (Sloan 1996).
Dividends	Cash dividends paid to common and preferred shareholders. Shown as absolute value (positive) in charts.

Peer Table Metrics

Term	Formula	Interpretation
SL/TC	$\text{Sales} \div \text{Total Capital (Debt + Equity)}$	Capital efficiency. Higher = more sales generated per dollar of capital invested.
SL/TL	$\text{Sales} \div \text{Total Liabilities}$	Leverage efficiency. Ratio > 1 is positive — sales exceed total liabilities.
TL/TA	$\text{Total Liabilities} \div \text{Total Assets}$	Leverage ratio. Lower = less debt-dependent. > 1 means liabilities exceed assets (technically insolvent).
OC Score	$\text{Operating Cash Flow} \div \text{Net Income}$	Earnings quality. > 1 means cash earnings exceed accrual earnings — positive signal.
Z Score	Altman Z-Score (TTM)	Bankruptcy predictor. > 3.0 = safe zone. 1.8-3.0 = grey zone. < 1.8 = distress zone. Not meaningful for banks/financials.
Sloan	$(\text{Net Income} - \text{CFO}) \div \text{Total Assets}$	Accrual ratio (Sloan 1996). Lower (more negative) = higher earnings quality. Companies with low accrual ratios historically outperform.
PE	$\text{Price} \div \text{Earnings per Share (TTM)}$	Valuation multiple. How much investors pay per dollar of trailing earnings.
EV/FC	$\text{Enterprise Value} \div \text{Free Cash Flow (TTM)}$	Cash flow valuation. Lower = cheaper relative to cash generation. More reliable than P/E as it accounts for debt.
CROIC%	$\text{FCF} \div (\text{Total Debt} + \text{Total Equity}) \times 100$	Cash Return on Invested Capital. Measures how much free cash is generated per dollar of capital. Higher = better capital efficiency.
EP%	$\text{Owner Earnings} \div \text{Enterprise Value} \times 100$	Economic Profit Yield. The "earnings yield" using cash-based Owner Earnings. Higher = more economic value created relative to enterprise value.
